

ENGINEERING MECHANICS 2009

**NATIONAL CONFERENCE
WITH INTERNATIONAL PARTICIPATION
MAY 11-14, 2009, SVRATKA, CZECH REPUBLIC**

FULL TEXTS

Editors: Jiří Náprstek and Cyril Fischer

Association for Engineering Mechanics

**Institute of Solid Mechanics, Mechatronics and Biomechanics,
Faculty of Mechanical Engineering, Brno Technical University**

**Institute of Theoretical and Applied Mechanics,
Academy of Sciences of the Czech Republic, v.v.i.**

**Institute of Thermomechanics,
Academy of Sciences of the Czech Republic, v.v.i.**

ŽĐAS, a.s., Žďár nad Sázavou

Czech Society for Mechanics

Engineering Academy of the Czech Republic

The editors did their best with the view to ensure a high printing quality of the Proceedings. However, their striving was partially hampered by the fact that some authors did not comply with instructions when preparing their manuscripts. Therefore, the editors cannot accept responsibility for the final appearance of these manuscripts.

Text and facts may be copied and used freely, but credit should be given to these Proceedings.

The complete set of EM2009 Conference Proceedings consists of two parts:

- **BOOK OF EXTENDED ABSTRACTS**
- **CD ROM (full text of papers and extended abstracts)**

**Copyright © 2009 Institute of Theoretical and Applied Mechanics,
Academy of Sciences of the Czech Republic, v.v.i., Prague**

First edition, 2009

ISBN 978-80-86246-35-2

ISSN 1805-8248

Honorary committee:

Miroslav Šabart, MSc
Boris Jakubík

Managing Director of the ŽĎAS, a.s.
Mayor of Svatka

Scientific committee:

chairman:	Jiří Náprstek, DSc	ITAM ASCR, Prague
members:	Ivan Dobiáš, DSc	IT ASCR, Prague
	Assoc. Prof. Miloš Drdácký, DSc	ITAM ASCR, Prague
	Michael Formánek, MSc	ŽĎAS, a.s., Žďár n.S.
	Jaromír Horáček, DSc	IT ASCR, Prague
	Prof. Přemysl Janíček, DSc	ISMMB FME, TU, Brno
	Prof. Ctirad Kratochvíl, DSc	ISMMB FME, TU, Brno
	Pavel Lamač, MSc	ŽĎAS, a.s., Žďár n.S.
	Jiří Minster, DSc	ITAM ASCR, Prague
	Ladislav Půst, DSc	IT ASCR, Prague
	Prof. Jaromír Příhoda, PhD	IT ASCR, Prague
	Prof. Jan Vrbka, DSc, RNDr	TU, Brno
	Igor Zolotarev, PhD	IT ASCR, Prague

List of sections:

KEY	- Keynote Lectures	MCT	- Mechatronics
BIO	- Biomechanics	REL	- Reliability
DYN	- Dynamics	SOL	- Mechanics of Solids
FLU	- Fluid Mechanics	TEC	- Technological Processes
FRA	- Fracture Mechanics	TER	- Thermodynamics
KIN	- Kinematics		

The Conference is hosted by the hotel ŽĎAS at Svatka

KEYNOTE LECTURES

Frýba L.: <i>Hundred years anniversary of Prof. Koloušek</i>	3	#K01
Laryš F., Havlíček J., Janíček P.: <i>CAD concept–visions in recent past and present reality</i>	11	#K02
Tesar D.: <i>Next wave of technology</i>	39	#K03

PAPERS

Antoš P., Jonáš P., Mazur O., Uruba V.: <i>Properties of the hot-wire probes for simultaneous measurement of the velocity and the binary-mixture concentration</i>	63	#122
Antoš P.: <i>Overheating limit for the velocity measurement by CTA hot-wire anemometry</i>	69	#215
Apetaur M., Barbora J., Buchta J., Janeček B., Kupka L., Marek M., Šklíba J.: <i>Testing of actively controlled driver's seat</i>	73	#204
Balda M.: <i>Loading processes with various spectral properties for fatigue tests</i>	89	#170
Bednář L., Tajč L., Mach J.: <i>Effect of protecting screen on the flow in control valves</i>	99	#186
Benčat J., Papán D.: <i>Assessment, measurement and monitoring of the Old Bridge crossing Danube in Bratislava</i>	111	#219
Blekta J., Mevald J.: <i>Reduction of the vibration effects actuating in general direction on colliery machine driver</i>	121	#278
Brož J., Kruis J.: <i>An algorithm for corner nodes selection in the FETI-DP method</i>	129	#187
Brožovský J., Konečný P.: <i>Selected problems of nonlinear concrete modelling</i>	141	#264
Bublík O., Vimmr J., Jonášová A.: <i>Numerical solution of compressible flow problems using the finite volume flux-vector splitting schemes on unstructured meshes</i>	147	#201
Byrtus M., Skála O., Zeman V.: <i>Modelling and behaviour of a bogie on irregular track</i>	159	#232
Čečrdle J., Gallovič D.: <i>NASPRO 3.0 – software tool for transformation and vizualization of aircraft structure modal analysis results</i>	175	#114
Čech V., Jevický J.: <i>Simplified dynamic model of the transmission II</i>	181	#220
Čulík J.: <i>CDCSIS – software for discrete continuous simulation</i>	197	#108
Drobný V., Valášek M., Vaculín O.: <i>Active suspension system from the lateral dynamics point of view</i>	207	#214
Eisner I., Lizon I., Žmindák M.: <i>Design damping structure by finite element method</i>	219	#243
Fiala Z.: <i>Is the logarithmic time derivative simply the Zaremba-Jaumann derivative?</i>	227	#211
Fialová S., Pochylý F., Rinka L.: <i>The boundary condition of the adhesive forces effect on the solid/liquid interface</i>	241	#253
Filip P., David J.: <i>Determination of flow rate of viscoplastic fluids in annuli using an additive method</i>	247	#195
Fischer C., Náprstek J.: <i>Two equations for description of the pendulum damper</i>	253	#134
Frankl J.: <i>The changes in compression strength of wood along and across grain caused by an impact of damage to wood by wood-damaging fungi</i>	261	#149
Frankl J., Kloiber M., Kučerová I., Drdácý M.: <i>Impact of chemical corrosion on mechanical characteristics of wood</i>	273	#150

František O.: <i>Analysis and optimization of the shifting mechanism</i>	281	#113
Frantík P.: <i>Post-critical behaviour of beam loaded by follower force</i>	289	#109
Frydryšek K., Marek P.: <i>Stochastic model and reliability assesment applied for the platinum ore disintegration process</i>	299	#281
Frýba L., Pirner M., Urushadze Sh.: <i>Investigations of carbon fibre reinforcement on steel elements</i>	311	#196
Gabriel D., Plešek J., Kolman R., Valeš F., Ulbin M.: <i>Two plates impact problem for testing accuracy and stability of finite element solutions to wave propagation</i>	317	#202
Grešl M., Šika Z., Valášek M.: <i>Parametric synthesis of linkage mechanisms by dynamic systems</i>	329	#127
Guran A.: <i>Stabilizing periodic orbits of chaotic regimes in a Kelvin type gyrostat satellite</i>	337	#160
Habán V., Pochylý F., Fialová S.: <i>The second viscosity of fluids</i>	349	#250
Hajžman M., Polach P.: <i>Parameter identification of a leaf spring dynamic model</i>	361	#147
Hajžman M., Klášterka H., Vimmr J.: <i>Analytical solution of gaseous flow in a rectangular microchannel with second-order slip flow boundary conditions</i>	375	#198
Hamrle V., Šika Z., Valášek M.: <i>Usage of mechanism calibrability in design of parallel kinematical structures</i>	383	#128
Himr D., Habán V., Pochylý F.: <i>Sound speed in the mixture water – air</i>	393	#255
Holický M., Sýkora M.: <i>Global factors for reliability verification of reinforced concrete structures</i>	403	#241
Horáček J., Vlček V., Sváček P., Feistauer M.: <i>Comparison of numerically simulated pressure on the surface of a fluttering profile with experiment in wind tunnel</i>	413	#132
Horák M., Jirásek M.: <i>Localization properties of isotropic damage models</i>	425	#208
Hortel M., Škuderová A.: <i>Damping influence on impact effects with prestress in the class of non-linear time heteronymous pseudoplanetary systems</i>	435	#178
Hračov S., Náprstek J., Pospíšil S.: <i>Non-proportional damping effect on dynamic response of footbridges</i>	453	#188
Hrubý Z., Plešek J., Tin S.: <i>Modelling of micro and nano indentation of modern nickel-based superalloys for turbofans</i>	469	#107
Hružík L.: <i>Pulsating flow in pipe</i>	475	#274
Hubík V.: <i>Model based design for EC motor control</i>	485	#258
Hůlka J., Petruška J.: <i>Computer simulation of ductile fracture in rod cutting process</i> . . .	495	#240
Chalupa M., Veverka J., Vlach R.: <i>Vehicle track dynamic loading simulation</i>	501	#158
Jahoda J., Valach J.: <i>Digital image correlation for investigation of the shapes of the steel plate girders' walls in the late stages of fatigue</i>	511	#257
Janczarek M. M.: <i>The analysis of wall temperatures in a fruit storage in the aspect of transient heat flow</i>	513	#156
Janczarek M. M.: <i>Technological description of heat and mass transfer processes in thermal treatment of fruit storage chambers</i>	519	#157
Janda T., Šejnoha M.: <i>Application of dimension reduction in tunnel excavation problem.</i>	523	#228
Jandejsek I., Vavřík D.: <i>Determination of actual crack position using digital image correlation</i>	533	#263
Jerga J., Križma M.: <i>Damage cumulation functions of concrete</i>	537	#244
Jirásko P., Václavík M.: <i>Residual spectra of displacements of conventional and electronic cams</i>	547	#280

Jiroušek O., Zlámal P., Žák O.: <i>Real-time observation of trabecular bone microstructure during micromechanical testing</i>	563	#174
Jirsák M., Zacho D., Michálek P.: <i>Pedestrian level wind near rectangular buildings</i>	569	#209
Jíra A., Petrtýl M.: <i>Stability of rigid implants with peripheral elastic layer</i>	579	#197
Jonáš P., Mazur O., Uruba V.: <i>Surface roughness and external flow turbulence joint effect on turbulent boundary layer</i>	585	#224
Jůza Z., Rudas B., Vaník V.: <i>Numerical simulation of unsteady flow in a turbine stage including labyrinth seal at the shroud</i>	601	#269
Kalous J.: <i>Action of backlashes in double – motor electromechanical drives</i>	617	#248
Kellner J., Zeman V.: <i>Kinematic excited vibration of bladed disk</i>	629	#110
Keršner Z., Lehký D.: <i>Determination of intrinsic brittleness of concrete using fracture experiment and its simulation</i>	641	#102
Kharlamov A.A., Filip P., Švrčinová P.: <i>A remark to the reptation theory</i>	645	#194
Klimentová P., Pražák J.: <i>Physical modelling of cardiovascular system</i>	651	#119
Kolman R., Plešek J., Gabriel D.: <i>Stability analysis of plane serendipity finite element for explicit linear elastodynamics</i>	657	#165
Korbel J., Klusák J., Knésl Z.: <i>Fracture analysis of epoxy-aluminum adhesive joint exposed to thermal and structural loads</i>	673	#120
Koudelka P.: <i>Contemporary state of the general lateral pressure theory - active pressure</i> .	681	#290
Kratochvíl C., Heriban P., Švéda P.: <i>Control of chaos in the dynamic systems</i>	695	#168
Králík J., Ivánková O.: <i>Deterministic and probabilistic analysis of ventilating concrete chimney reliability during earthquake</i>	703	#276
Králík J., Rozsár P.: <i>Nonlinear analysis of reinforced concrete wall subjected to blast load</i>	715	#277
Král J.: <i>Aeroelastic balance for tall building model tests</i>	727	#227
Kruis J.: <i>Material interface problems solved by domain decomposition methods</i>	735	#193
Kruisová A., Plešek J., Červ J.: <i>The influence of the choice of a constitutive relation in the modelling of the wave propagation in pre-stressed medium</i>	743	#111
Krybus D., Patzák B.: <i>Extended Delaunay mesh generator</i>	751	#216
Křen J., Pokorný J., Koudela K.: <i>Modelling of the knee joint arthroplasty</i>	757	#136
Kuběna I., Hutař P., Náhlík L., Kruml T.: <i>Determination of mechanical properties of thin films by nanocompression</i>	767	#191
Kukula P., Valášek M.: <i>Forward kinematical solution of hexasphere by structural approximation</i>	775	#124
Kunecký J., Jíra J.: <i>Numerical modeling of protective sport helmets</i>	785	#272
Kyncl M., Punge P.: <i>Force effects of jaw crusher mechanism</i>	789	#118
Kytýř D., Jiroušek O., Vavřík D.: <i>Microstructural properties of acetabular region of human pelvic bone revealed using micro-CT</i>	799	#273
Lacko B.: <i>Kinematics of an undercarriage with ball elements</i>	803	#270
Lukerchenko N., Ivanova I., Chára Z., Vlasák P.: <i>Transition from the saltation mode of bed load transport to the rolling mode</i>	809	#223
Makovička D., Makovička D.: <i>Response analysis of building under seismic effects of railway transport</i>	817	#121
Malec J., Ficek F.: <i>On side sweep of sheet piles straightening</i>	827	#182

Žďárský M., Valach J.: <i>Comparison of strain fields of CT specimen determined by FEM and by termoplastic measurement</i>	1543	#256

Table of contents

(grouped by sections)

KEY – Keynote Lectures

Frýba L.: <i>Hundred years anniversary of Prof. Koloušek</i>	3	#K01
Laryš F., Havlíček J., Janíček P.: <i>CAD concept–visions in recent past and present reality</i>	11	#K02
Tesar D.: <i>Next wave of technology</i>	39	#K03

BIO – Biomechanics

Jiroušek O., Zlámal P., Žák O.: <i>Real–time observation of trabecular bone microstructure during micromechanical testing</i>	563	#174
Jíra A., Petrtýl M.: <i>Stability of rigid implants with peripheral elastic layer</i>	579	#197
Klimentová P., Pražák J.: <i>Physical modelling of cardiovascular system</i>	651	#119
Křen J., Pokorný J., Koudela K.: <i>Modelling of the knee joint arthroplasty</i>	757	#136
Kunecký J., Jíra J.: <i>Numerical modeling of protective sport helmets</i>	785	#272
Kytýř D., Jiroušek O., Vavřík D.: <i>Microstructural properties of acetabular region of human pelvic bone revealed using micro-CT</i>	799	#273
Zlámal P., Jiroušek O., Němeček J.: <i>Calibration of constitutive model for trabecular bone based on nanoindentation</i>	1525	#172

DYN – Dynamics

Benčat J., Papán D.: <i>Assessment, measurement and monitoring of the Old Bridge crossing Danube in Bratislava</i>	111	#219
Blekta J., Mevald J.: <i>Reduction of the vibration effects actuating in general direction on colliery machine driver</i>	121	#278
Byrtus M., Skála O., Zeman V.: <i>Modelling and behaviour of a bogie on irregular track</i> .	159	#232
Čečrdle J., Gallovič D.: <i>NASPRO 3.0 – software tool for transformation and vizualization of aircraft structure modal analysis results</i>	175	#114
Čulík J.: <i>CDCSIS – software for discrete continuous simulation</i>	197	#108
Fischer C., Náprstek J.: <i>Two equations for description of the pendulum damper</i>	253	#134
